

## Take your life into your own hands

Many of us have to live a trauma biography, because we were not wanted, not loved and not protected. Therefore we survive instead of living our own life. Even collectively we force us mutually to accept our trauma-surviving-strategies, in our families, in relationships with our partners, in the economy as well as in politics.

Based on Identity oriented Psychotraumatheory (IoPT) we can offer a therapeutic method by the help of the Intention Method, to exit our trauma biography. We can live instead of only to survive. We then understand what is possible to do and what is impossible to do for ourselves and in our relations.

I am happy to meet you at the 5th International Congress of the Association promoting Healthy Human Autonomy e.V.
